

Family Information Sheet Two: Career Exploration

Dear Family Member,

During today's lesson, your student took a career interest inventory to learn how their interests and skills relate to possible careers. After doing some research on a few different careers, they selected one that they want to focus on during this class.

Family Activity

Talk to your student about their career goals and the career that they selected for their Career Day Presentation. Search the classified ads or job postings in your local newspaper or on the internet for positions in that field. Notice what degrees or certificates the positions require. Decide together which school or schools would prepare your student for a career in that field.

Thank you for helping your student as they work towards making the college dream a reality!

Sincerely,

The Kids2CareersTeam
